PROFESSIONAL SUMMARY

Final-year B.Tech student with hands-on experience building and supporting real-world mobile applications used by actual customers — including a billing system deployed and actively used in a retail shop. Comfortable explaining technical concepts in simple terms, diagnosing user issues, and turning feedback into product improvements. Strong written and verbal communicator, quick learner, and confident using AI tools to work efficiently. Seeking a Customer Success Associate role where I can apply my product understanding, troubleshooting mindset, and people-first approach to help clients succeed.

CORE STRENGTHS

- **Client Communication** — comfortable explaining features and workarounds to non-technical users
- **Problem Solving & Troubleshooting** — diagnosed and fixed real issues across multiple live applications
- **Product Understanding** — experience translating user needs into app features (billing, tracking, resource sharing)
- **Adaptability & Fast Learning** — picked up new frameworks and tools independently to ship projects
- **Documentation** — wrote clear feature notes and instructions for end users of the billing app
- **Team Collaboration** — worked cross-functionally between design, development, and end users

RELEVANT PROJECT EXPERIENCE

Billing App — Deployed for Real Shop Use (Flutter, Firebase)

- Directly supported a real shop owner as the end user — gathered requirements, trained them on the app, and resolved issues as they came up during daily use.
- Handled product management, pricing, and bill generation workflows; reduced manual calculation errors and sped up daily billing.
- Acted as the first point of contact for user questions and bugs, translating shop-floor feedback into app fixes and improvements.

AssignMate — Student Resource Sharing App (Flutter, Firebase)

- Built and launched an app for students to share assignments, notes, and previous-year question papers.
- Designed an intuitive UI so non-technical users could upload and access resources without guidance, reducing support needs.
- Solved a real academic collaboration problem based on direct feedback from fellow students.

Expense Tracker App (Flutter)

- Developed an app to help users track daily expenses with a clean, easy-to-navigate interface.
- Structured data storage for reliability and fast access to historical records.

Weather App — API Integration (Dart, REST APIs)

- Integrated a REST API to fetch and display real-time weather data, temperature, and forecasts.
- Handled edge cases (failed requests, slow responses) to keep the experience smooth for end users.

TECHNICAL & WORKING SKILLS

- **Languages:** Java, C++, Python, Dart, SQL
- **Web:** HTML, CSS, JavaScript, TypeScript
- **Tools & Platforms:** Flutter, Android (Java), Firebase, REST APIs, Git, GitHub
- **Core Concepts:** DBMS, API Integration, App Development, Problem Solving
- **AI Tools:** ChatGPT, Claude, GitHub Copilot — used daily to speed up debugging, documentation, and learning

EDUCATION

D Y Patil College of Engineering and Technology, Kolhapur — B.Tech (Final Year)

Zeal International School and College, Sangli — 12th (2023)

Cambridge School, Miraj — 10th (2021)
